==========================================================================
                                TASK 4 - Q1
==========================================================================
Original List:  [10, 501, 22, 37, 100, 999, 87, 351]
List containing all EVEN numbers from Original List:  [10, 22, 100]
List containing all ODD numbers from Original List:  [501, 37, 999, 87, 351]
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q2
==========================================================================
Original List:  [10, 501, 22, 37, 100, 999, 87, 351]
Count of prime numbers in given list:  1
List containing all PRIME numbers from given List:  [37]
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q3
==========================================================================
The given Python List: [10, 501, 22, 37, 100, 999, 87, 351]
Total no. of happy numbers in the given Python List: 2
The 2 Happy Numbers from the given Python List are: 10 100
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q4
==========================================================================

Enter a number with at least 2 digits: 98765
Sum of first and last digit of an integer 98765: 14
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q5
==========================================================================
1 Rupee: 0, 2 Rupee: 0, 5 Rupee: 2, 10 Rupee: 0
1 Rupee: 0, 2 Rupee: 5, 5 Rupee: 0, 10 Rupee: 0
1 Rupee: 1, 2 Rupee: 2, 5 Rupee: 1, 10 Rupee: 0
1 Rupee: 2, 2 Rupee: 4, 5 Rupee: 0, 10 Rupee: 0
1 Rupee: 3, 2 Rupee: 1, 5 Rupee: 1, 10 Rupee: 0
1 Rupee: 4, 2 Rupee: 3, 5 Rupee: 0, 10 Rupee: 0
1 Rupee: 5, 2 Rupee: 0, 5 Rupee: 1, 10 Rupee: 0
1 Rupee: 6, 2 Rupee: 2, 5 Rupee: 0, 10 Rupee: 0
1 Rupee: 8, 2 Rupee: 1, 5 Rupee: 0, 10 Rupee: 0
1 Rupee: 10, 2 Rupee: 0, 5 Rupee: 0, 10 Rupee: 0
Total number of ways to make Rs. 10 using Rs. 1, Rs. 2, Rs. 5, and Rs. 10 coins: 10
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q6
==========================================================================
Duplicates in all three lists: [0, 4, 5]
--------------------------------------------------------------------------

==========================================================================
                                TASK 4 - Q7
==========================================================================
```

```
First non-repeating element in the given list :  3
---------------------------------------------------------------------------

===========================================================================
                                  TASK 4 - Q8
===========================================================================
Given sorted list :  [1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15]
Rotated list :  [10, 11, 12, 13, 14, 15, 1, 2, 3, 4, 5, 6, 7, 8, 9]
Minimum element in a rotated and sorted list :  1
---------------------------------------------------------------------------

===========================================================================
                                  TASK 4 - Q9
===========================================================================
Given Python List:  [10, 20, 30, 9]
Given Value:  59
Triplet in the given list whose sum is equal to the given value:  [20, 30, 9]
---------------------------------------------------------------------------

===========================================================================
                                  TASK 4 - Q10
===========================================================================
Given python list:  [4, 2, -3, 1, 6]
Sub-list with sum equal to Zero found.
Sub-list:  [2, -3, 1]
---------------------------------------------------------------------------

Process finished with exit code 0

```
